

Something I Said

Tors

Was it something that I said?
I don't believe you
When you left me there for dead
It wasn't easy
All these people and all these places we know
And now we're choosing sides of the bed to call our own

You give me hope when we lie in the dark
You give me up when we're further apart
You said it all when you said that there's nothing to say
I say, there is now

And I'll never know why you left
All that you want is to be friends
But I, I won't try to pretend
I'm gonna see you again
Why would I do that to myself?
Time won't let me forget

Was it only in my head?
I'll never know now
And we didn't reach the end
Oh, what a let-down
All the moments we made or wasted alone
I couldn't say goodbye
In my heart, they have a home

You give me hope when we lie in the dark
You give me up when we're further apart
You said it all when you said that there's nothing to say
I say, there is now

And I'll never know why you left
All that you want is to be friends
But I, I won't try to pretend
I'm gonna see you again
Why would I do that to myself?
Time won't let me forget

Oh, oh-oh, oh, oh-oh
I'll be fine
Oh, oh-oh, oh, oh-oh
That's a lie

And I'll never know why you left
All that you want is to be friends
But I, I won't try to pretend
I'm gonna see you again
Why would I do that to myself?
Time won't let me forget
