

Far Beyond Existence

Torture Squad

This is the life we live in a world we think we know
As quick as a deadly bullet, mankind passes, but the work remains
Understand your instinct, maybe you'll become a myth, but there's a price to
pay
Express yourself, confront yourself
Courage to break all the bricks

After this life nobody knows, eternal enigma
Maybe one day, more wisdom will come
To know this deepest abyss

Universe is here, there, everywhere
The sun and moon still spying on us
Incandescent rock, going somewhere
Release your mind, leave all behind

Feel the breeze
Breathe the air
Look around
State of mind

Far Beyond existence
Far Beyond the grave
Far Beyond existence
Far beyond
More questions than answers
Far Beyond existence
Far beyond the grave
Far Beyond existence
Far Beyond life

Two things are infinite
the universe and human stupidity
But, with respect to the universe
have not got the absolute certainty

Human being; Thinks can do anything
Haughtiness; One Time will learn
Penitence; It can be late

Pray for time

This is the life we live in a world we think we know
As quick as a deadly bullet, mankind passes, but the work remains
Understand your instinct, maybe you'll become a myth, but there's a price to
pay
Be free, confront yourself
Courage to break all the bricks

Feel the breeze
Breathe the air
Look around
Peace of mind

Far Beyond Existence
Far Beyond the Grave

Far Beyond Existence
Far beyond Life
