

## Stereotaxic Atrocities

Tourniquet

(Lead - Lenaire)

Brilliant scientific enterprise  
The altruistic benefit of human justifies  
A white lab coat represents the icon  
Eradicate disease, the pedestal it stood on  
lies shattered on the floor

Just another day, the dead half a million lay  
Your taxes will foot the bill, supply animals to kill

Stinging infusion of chemical  
The moribund patient clings to the wall  
Another scapegoat to suffer for our sickening vices  
You cut their neck, they cut your check  
Endless barrage of repetition, satisfies your need  
Of colleague competition

Pseudo scientist watches in fascination  
As electrode-ridden monkey #32  
Has his dignity completely destroyed  
We need another \$200,000 to find a scientific reason  
why cats land on their feet  
Feline fuel for the incinerator

Even though this test will not help the human mess  
Continue it anyway, the car payment's due today  
(Lead - Mendez)
