

Chaos

Tove Styrke

Chaos, you've been my friend for quite a while
Anger, you've been around for quite some time
I can't escape from it

Love, babe, it eats me up alive
We're loveable, but still we're terrified
I can't escape from it

My heart is infected
I gotta protect it
Don't you dare try to break it
I'm gone

My body is fragile
So please let me rest now
Don't you dare try to stop me
I'm gone

Living for a dream so far away
Trying to cover up for what we are
We can't escape from it
We have to fight for it

My heart is infected
I gotta protect it
Don't you dare try to break it
I'm gone

My body is fragile
So please let me rest now
Don't you dare try to stop me
I'm gone

It's a shame that we start lying
It's a shame that we're denying

My heart is infected
I gotta protect it
Don't you dare try to break it
I'm gone

My body is fragile
So please let me rest now
Don't you dare try to stop me
I'm gone

My heart is infected
I gotta protect it
Don't you dare try to break it
I'm gone

My body is fragile
So please let me rest now
Don't you dare try to stop me
I'm gone
