

## Below Us, All the City Lights

Tower of Power

While driving through the moonlight  
We stop at the top of the hill  
The night stood still for just a moment  
As we share that crystal feel

Below us, all the city lights  
And all the people living their lives  
Dreaming their dreams

We sit and hold each other  
While listening to our favorite tune  
A half bitten moon  
A loving whisper  
To show her I really care

Below us, all the city lights  
And all the people living their lives  
Dreaming their dreams

It's time to leave the hilltop  
So we can be back before dawn  
The moon is gone  
The stars are fading  
As we turn that one last look

Below us, all the city lights  
How they glow  
As we steal a kiss before we go  
And now I realize  
How much has gone  
The tenderness  
We have now will last

Below us, all the city lights  
Keep on shining  
(All the city lights)  
Oh oh oh... yeah yeah  
All the  
All the city lights

Oh oh oh... lights  
Where they are above  
All the city lights
