Imagine my vision

But you can't cause your mind's in the prison

The shine from the prism can blind in an instant

This the new standard of living

Combined it with wisdom, apply it to physics

This shit get acidic, If I said it, I meant it

I live it, you mimic, I'm living no limits

SAVEMONEY the modern No Limit, fuck that, the modern religion

You gotta respect it, put this shit in perspective

If you feel it, then question it

Only speak for your benefit and meditate on the writing tip

Got shit for the medal they'd never get!

Ossssssss!
