

Aftermath

Toxic Holocaust

Extinction of mankind in this barren waste
Debris still smoldering, the lands been erased
Armies of soldiers that fought 'till their death

Fooled into believing what their government said
Packed up, shipped out, and led off to war
Ordered to kill to settle a score
Who's left to blame when everyone's dead?
There's no wrong or right 'cause this is the end

Nuclear, chemical, bio attack
Weapons too powerful for humans to grasp
Kill at whim, die in a flash
Armies of millions, gone in a blast

Life turns to hell, kiss it goodbye
Life's not worth living, it's better to die
Tanks on the battlefield frozen in place
Destroy it all, don't leave a trace
