

Breaking Class

Toxik

It's gonna go it's gonna blow and we all know
That it's ready to explode
Out of time in decline lost our mind
It's the final episode
Go get a gun you're the one it's begun
It's the evil master plan
You think you're right and fixed to fight, full of spite
Can you even understand

Violence is never the way
But sometimes its all that we have
Nothing left to say
Thats when we start breaking class
Civilizations will fall
When balance is lost to the land
Worthless is how you are caste
That's when we start breaking class

We're terrified, scarred for life, and neutralized
by everything we're shown
It's in your head, in your thoughts and in your mind
It's how we're bought and sold
A breaking down, spinning round a thorny crown
You sacrifice yourself
Close the door friendly war fuck the poor
And their burden on the wealth

Violence is never the way
But sometimes its all that we have
Nothing left to say
Thats when we start breaking class
Civilizations will fall
When balance is lost to the land
Worthless is how you are caste
That's when we start breaking class

Serve, serve until your end, on this they can depend
Slave enslaved again
Cry for all the children lost, return them to the dust
When will this cycle end?

Violence is never the way
But sometimes its all that we have
Nothing left to say
Thats when we start breaking class
Civilizations will fall
When balance is lost to the land
Worthless is how you are caste
That's when we start breaking class
