Spontaneous

We fought in wars to defend all of our beliefs Now people starve in the streets at our feet In middle eastern lands war heroes making plans We live out roles in their psychotic schemes

These lies are old, it's obvious Actions speak louder than words And though it seems we're oblivious The time is here for us to act before

[Chorus:] Spontaneous Our world burns up in flame Spontaneous For higher profit gains Spontaneous The time to act is now Spontaneous

They talk retaliation like that might save this nation They'll be no more air left to breath - believe No second life, no second strike, I had a dream what it was lik e There was a flash and we were gone!

These lies are old, it's obvious Actions speak louder than words And though it seems we're oblivious The time is here for us to act before

[Chorus:]

The path of destruction we're leading the way The cancer, the answer, to God we must pray Blind leading blind to an unearthly end Burned out and beaten no more to defend

These lies are old, it's obvious Actions speak louder than words And though it seems we're oblivious The time is here for us to act before

[Chorus:]

Toxik
