

White Phosphorus

Toxique

I'm just a piece of ice
I thaw when being enticed
I'm melting, I'm melting down

I burn just like white phosphorus
D'you know some quiet place for us
I'm burning, I'm burning now

Oh, my little love
What can we do?
Oh, my little love
How'll we get through?
Oh, my little love
What can we do?
Oh, my little love
It's up to you

I feel that's not enough
Would you take my earplugs out
It's too silent, too silent here
Oh, baby, baby, that's much better now
Now I can hear what you've always said to me
But you don't need to talk
Don't need to talk this time

Oh, my little love
What can we do?
Oh, my little love
How'll we get through?
Oh, my little love
What can we do?
Oh, my little love
It's up to you

Strike a light
What I have is right here
I was blind
What I have is right here

Oh, my little love
What can we do?
Oh, my little love
How'll we get through?
Oh, my little love
What can we do?
Oh, my little love
It's up to you
