

## Good Love

TQ

I try to think it will be alright  
And I'll be back soon  
But when I walk away it just ain't right  
And you feel it too  
We gotta find a way to keep ourselves together  
And it don't matter how far away I go  
I'd still be loving you

I see a million pretty faces in the crowd  
You're the only one I care about  
I don't wanna but I gotta say goodbye for now

What I know about love is  
That love is right  
When we love each other  
Like we did last night  
I'ma take you with me  
I'ma hold it tight  
Baby all you gotta do is call me  
I'm on a return flight

I'm trying to make you see  
That you're alright with me  
And we'll be together forever

I'm never too far away  
To come and give you good love, good love  
I can give you good love  
Baby I'll take a ride  
On a jet plane  
To come and give you good love  
Good love  
Baby I'll give good love

I wake up early in the morning  
Before the break of day to give you good love  
And from anywhere on earth I'll find my way back home  
Just to give you good love  
Don't underestimate when you give me good love  
It's an addiction, and nobody can understand  
Nobody could understand, good love

I see a million pretty faces in the crowd  
But there's only one I care about  
I don't wanna but I gotta say goodbye for now

I'm trying to make you see  
That you're alright with me  
And we'll be together forever

I'm never too far away  
To come and give you good love, good love  
I can give you good love  
Baby I'll take a ride  
On a jetplane  
To come and give you good love  
Good love

I'm never too far away  
To come and give you good love, good love  
I can give you good love  
Baby I'll take a ride  
On a jetplane  
To come and give you good love  
Good love
