

Right Here

TQ

I've always been here
Regardless if it's only one night
I've seen every tear
Even if I could not stop
I might be gone for a while
And it ain't easy to do
But baby I wait for a smile
It's the only thing I want from you

Hold on to the heart in your hand
Next time that you're feeling lonely
I need you to understand
I'm here 'cause I wanna be

I'll be right here
And when the stars stop shining
I'll still be right here
And when the clouds won't go away
I'll be right here
You don't have to worry about a thing
I'll be right here
I'm here right here

I don't wanna fire
Baby girl anything is better than that
It's only one night
'Cause tomorrow I gotta go back
I know I just got here
But I stay on my grind
It don't matter where I go
Baby you stay on my mind

I take care of the heart in your hand
I know that you're feeling lonely
I need you to understand
I'm here 'cause I wanna be

I'll be right here
And when the stars stop shining
I'll still be right here
And when the clouds won't go away
I'll be right here
You don't have to worry about a thing
I'll be right here
I'm here right here

Close your eyes
When you cry
Where was I
By your side
Remember your pets
Remember your dog
Who did you run to
Who did you call
When I lay bleeding on the bed
If it wasn't for you
I'd probably be dead

How could you not see
When you are lying
This has been going on for so much time
Take a deep breath and everything will be fine

I'll be right here
And when the stars stop shining
I'll still be right here
And when the clouds won't go away
I'll be right here
You don't have to worry about a thing
I'll be right here
I'm here right here

I'll be right here
And when the stars stop shining
I'll still be right here
And when the clouds won't go away
I'll be right here
You don't have to worry about a thing
I'll be right here
I'm here right here
