

# Separated

Trace Cyrus

Fake a smile like I'm doing alright  
Don't worry 'bout me, I'm doing just fine  
Reminisce about the times we shared  
I hope you know I'll always care for you  
I had to pack my bags and walk away  
Nothing felt the same since we broke up on the last  
It's a small town, I'll see you around  
I hope you're saying sober as you're searching for a way out

I stay levitating  
Pick up pieces when you're jaded  
I could waste all my time with you  
Take my heart, you got the power  
Remember kissing in the shower  
You took me and you made me brand new

But now we're just separated  
I love you and I hate this  
It kills me just to see him with you  
[?] into a fire  
I'd make you my desire  
Are we over, tell me the truth?

Am I wrong for [?]  
Seem like everyday we were in a fight

'Cause for you baby I would've killed  
[?] was a chemical reaction  
I still want you back but I can't see us lasting  
[?] let me drown  
I never knew you felt this way, I've never seen you break down

I stay levitating  
Pick up pieces when you're jaded  
I could waste all my time with you  
Take my heart, you got the power  
Remember kissing in the shower  
You took me and you made me brand new

But now we're just separated  
I love you and I hate this  
It kills me just to see him with you  
[?] into a fire  
I'd make you my desire  
Are we over, tell me the truth?

Living in the night baby  
Looking for you right here  
But our past is all I can see  
Is this what fake romance is  
Searching for second chances  
Tell me if you're thinking of me

But now we're just separated  
I love you and I hate this  
It kills me just to see him with you  
[?] into a fire

I'd make you my desire  
Are we over, tell me the truth?

Now we're just separated  
I love you and I hate this  
It kills me just to see him with you  
[?] into a fire  
I'd make you my desire  
Are we over, tell me the truth?
