

Better Things

Tracey Thorn

Don't drag me down just because you're down
And just 'ca
use you're blue, don't make me too
And though you've found, you need more than me
Don't talk to me about being free
That's freedom without love
And magic without love
Magic without love
Hear me say
Better things will surely come our way
Hear me say
Better things will surely come our way
You say the magic's gone, well I'm not a magician

You say the spark's gone, well get an electrician
And save your line about needing to be free
All that's bullshit babe, you just want rid of me
You want freedom without love
And magic without love
And magic without love, yeah
Hear me say
Better things will surely come my way
Hear me say
Better things will surely come my way
