

Candy

Tracey Ullman

You always got your hand in the candy jar, trying to sneak a piece or two

But even though you think nobody's watching, ev'rybody's watching you

I want some candy, give me some candy, I want some candy too
You're always taking but you're never giving, girls like having candy too

Your mamma never told you too much candy just might make you sick

You always want the best piece for yourself but this time you don't get to pick

I want some candy, give me some candy, I want some candy too
You're always taking but you're never giving, girls like having candy too

Soft in the middle, peanut brittle, bitter sweet and hardy too
Saw you lick your fingers, couldn't get enough, any kind of candy will do, do, do, do, do, do, do, do, do, do, do

So pull back my rapper and take a bite

This should really sooth your appetite

I'm a soft centre really, a sweet tooth killer

A gentle driller, a cavity filler

I want some candy, give me some candy, I want some candy too
You're always taking but you're never giving, girls like having candy, girls like having candy, girls like having candy too

I want some candy, give me some candy, I want some candy too
You're always taking but you're never giving, girls like having candy too

I want some candy, give me some candy, I want some candy too
You're always taking but you're never giving, girls like having candy too

I want some candy
