

## Can You Feel It

Transatlantic

Can you feel it all around you?  
It's an ocean like the sun  
Where the spirit soul surround you  
And the turnkey farmers run

Say can you see where you are?  
You're out and about  
You better stay in the green  
Before real life wakes up and finds you out

Can't you see it all around you?  
It's a moment in the heart  
Let each guidance make you fuller  
Where you stop that's where you'll start

Say can you see where you are?  
You're out and about  
You better stay in the green  
Before real life wakes up and finds you out

Say can you see where you are?  
In the dead of night  
You've spent some days in the destiny of a better life  
Now is the time to arrive  
And you're out and about  
You better stay in the green  
Before real life wakes up and finds you out  
Finds you out
