

Step Across The Edge

Transglobal Underground

Time won't give you time when times are getting tough
there's people sittin' around
talking about love but if you
don't know how to get it,
then you don't want it enough
life's a time when we were moving far from home
In a mystery into the unknown and we were dancin' round each o
ther
but you don't find me alone

and I can step across the edge

from where I want to be

my heart won't drive my feet

only to leave you... leave you

Time will give you time when time in life is good
some kind of happiness, I did not deserve when you reached
out to take me higher
and I did not have the nerve
just one thing untied my feet were off the ground and I could f
ly
just one thing untied my heart was in the sky
I don't think I could live without you,
no matter how I try

and I got swept across the edge

from where I want to be

my heart won't drive my feet

only to leave you... leave you
