

# Come Together

Trapt

I was born in the jungle, yeah  
Where the storm gonna rumble, yeah  
Still gotta stay humble, yeah  
Never let my dream crumble, yeah  
As a world we so divided  
Left & Right it's so polarizing  
No alignment what the shows devising  
They profit more when emotions rising  
Media control the mindset  
They ain't got hold of mine yet  
An0maly why ain't you signed kid?  
'Cause I'm too real for that fine print, yeah  
But what I'm sayin' is bigger than me  
I wanna see all world religions at peace  
I'm sick of that rapper and I'm sick of that beat  
I'ma change the game for the kids in that street, yeah

When the roof starts cavin' in, we come together  
When the walls come crashin' down, we come together  
We are farthest apart when we forget we have hearts  
Now it's time for us to remember  
It's now or never, there's no one better when  
We come together

As a world we so divided  
Cold inside from the polarizin'  
Everyone is a hypocrite  
'Cause we point the finger but don't get it yet  
Black, white, gay, straight, man, woman  
All these labels off-puttin'  
Yeah, pride is great and I don't ever hate  
But this tribalism just separatin'  
It's okay to be yourself  
But hurts when all you do is follow  
Your soul and character gets hollow  
The truth the hardest pill to swallow  
Why do you think you're filled with sorrow?  
'Cause peace ain't sold in jewels and bottles  
You can't go livin' like them models  
Because they aren't even models

Hold up, this is the truth, I spit in the booth  
I don't do this for me, yeah, I did it for you  
I bring water to drought, I was sent for the youth  
To plant all of these seeds so the mission come true  
This is the truth, I spit in the booth  
I know life can get hard but this message is true  
Please don't give up  
This life is worth livin', I promise

When the roof starts cavin' in, we come together  
When the walls come crashin' down, we come together  
We are farthest apart when we forget we have hearts  
Now it's time for us to remember  
It's now or never, there's no one better when  
We come together

My hair long like Don King  
Y'all divide the nation like Shaun King  
I'm a rockstar like The Offspring  
Consider wisdom I'm offering  
MLK wanted content  
Plus Malcolm X, they got shot dead  
Y'all better not come for my head  
'Cause I got God, He don't want threats  
That's secret service, I speak in verses  
Like Allah, HaShem and Jesus worship  
Y'all peep the purpose like ye's are perfect  
I'll bring the church, you can keep the sermon  
One love, yes each is worthy  
Raise a World Cup, like a FIFA derby  
When karma come it go all at once  
So you better beg on your knees for mercy

Stop the hate and stop the threats  
In Obama-blue or that MAGA-red  
I know we can find that common thread  
And make world peace like Ron Artest  
Stop the hate and stop the threats  
In Obama-blue or that MAGA-red  
I know we can find that common thread  
And make world peace like Ron Artest, yes

When the roof starts cavin' in, we come together  
When the walls come crashin' down, we come together  
We are farthest apart when we forget we have hearts  
Now it's time for us to remember  
It's now or never, there's no one better when  
We come together
