

# Walking Disease

## Trash Talk

We are the unforgiven who never gave a fuck  
Time has passed us by, hardfucking luck  
Decaying bones and skin we walk this city to our death  
Pushing the pavement through our final rotting breath.  
I pollute this world with my filth, make it harder to breathe.  
Late at night I'm on the streets to bring the world to it's knees.  
We have no morals and there's no one to please  
We are your worst fucking nightmare we are walking disease
