

## The Edge Of Depravity

Trauma

Yearning in the age of depravity  
Convulse between love and nothingness  
Of fallen world and its all substitutes  
The created substance of new life  
Forbidden for the weak creatures  
But alive! as disease - a constant gift

The serpentines of DNA chains  
Demonic patters improve them to immortality  
The imprecated souls - keepers of wisdom  
Curse me in the name of human progress

Chaotic molecules in devilish motion  
Ordered in the colonies of energy  
Most organized structures of hate  
Macrobiotic greed of endless power  
Breeding the spawn of deity monsters  
Burning the obsolete manuscript of rules

The vanguard of lies, impious tribunal  
Lead us downward to the agnostic hell  
The world keeps turning on in slavery machine  
The worshippers of nothing  
Thrown away to endless Eden  
Profundity of bleeding, human nature remains  
That we are rise to ruin, that we're raise to pain
