

# All Fall Down

Travis

All fall down  
Down, down, down, down  
All fall down

My love is black and blue  
My love is next to you  
My love is true  
My love is made of wood  
My love is understood  
My love is good, good

And you can hide all you want  
But it doesn't change a single little thing  
And you can smile  
Till your heart falls out  
Still we will sing

All fall down  
Down, down, down, down  
All fall down

Your love is made of gold  
Your love is rock 'n' roll  
Your love is cold  
But your love will never lie  
Whatever we survive  
All in our light

And you can hide all you want  
But it doesn't change a single little thing  
And you can cry  
Till your eyes fall out  
Still we will sing

All fall down  
Down, down, down, down  
All fall down
