Ma-ma-ma-ma-ma-ma, my love

0000 00, 00 0 last night

That one star in the night sky
Seems to be shining brighter
You and I sitting side by side
The day we spent a quiet night
You had your head up only watching
The sky but
For me your side-profile shines brighter
Than the stars, my baby

The deepening night
The night, the moon and stars
Were jealous of you
Let the both of us remember that day

Last night, the words you and I spoke
Moonlight, my reflection in your eyes
Ma-ma-ma-ma-ma-ma, my love
The love we promised, beautiful last night

I'll hold you like the night breeze
I hope you never leave my arms (Yeah)
So that you can remember today for a lifetime
I'll even pick the stars for you
Yeah, our night full of excitement
The night we promised our future (Ooh, yeah)
You, who holds the stars of the universe
I'll become your moon (Yosh)
The love I gave you even before you asked for it
I pray that you'll accept it
I'm the Romeo who serves you tonight
I've probably always been yours (Wee, hoo)
