

Both Ends Burning

Treat

Death came today, I scared him away
I just gonna ride the waves in my time
I'm soaking the sun and feeling the one
I just gotta smile and read the motion of the ocean

When I rip, it's my way to fly
If I wipe into the rocks when tide is high

All I want is to light the flame in me
Let my soul ride free
With both ends, both ends burning
With both ends, both ends burning
Kiss the sky breathing
Feel my heart beating
With both ends, both ends burning
With both ends, both ends burning
I'm shooting the curl, I'm leaving the world
I don't wanna hear "You should have been here yesterday"
No fear of sharks, grey suits in the dark

And deep in my mind "No waves, no glory"

When the winds onshore has blown out
I look ahead to see what's behind

'Cause all I want is to light the flame in me
Let my soul ride free
With both ends, both ends burning
With both ends, both ends burning
Kiss the sky breathing
Feel my heart beating
With both ends, both ends burning
With both ends, both ends burning

Light the flame in me

Light the flame in me
Let my soul ride free
With both ends, both ends burning
With both ends, both ends burning
Kiss the sky breathing
Feel my heart beating
With both ends, both ends burning
With both ends, both ends burning
