

Doo-Wop Music

Trembling Blue Stars

Doo-wop music and you
Go hand-in-hand for me
Calling from another world
I hear those voices and I see
Us dancing late at night
Close and slow, close and slow
The music always takes me
Where I know I shouldn't go
I know I shouldn't go
I have to be so careful looking back
Doo-wop music and you
(We're lost in the moment)
Go hand-in-hand for me
(Lit only by moonlight)
You're almost in my arms again
(Falling softly in silver)
I can almost feel your body
(Falling gently on each heartbeat)
We're dancing late at night
Close and slow, close and slow
It's my chance to put things right
And this time never let you go
Never let you go
But I will never hold you tight enough
I've thought about you so
I've turned us inside out
The past is always close
I've tried to slip it but to no avail
I've thought about you so
I've turned us inside out
The past is always close
You're everything I see
You're every sound
Doo-wop music and you
Reach out to me from days now lost
Doo-wop music and you
Reach out to me from days now lost
We're dancing late at night
Close and slow, close and slow
It's my chance to put things right
And this time never let you go
Never let you go
But I will never hold you tight enough
I will never hold you tight enough
Falling softly in silver
Falling softly in silver
