

Decay

Tremonti

Don't fight, there's nothing you can do
(Let it get the best of you)
I feel there's nothing I can say
(Look what you've gone and done to me)
Reach down and throw it all away

You know this fight it can't be won
It can't be won

They said
All we had we've wasted
Something like decay
You know it won't be long
Before we've spent all our lives complacent
Isn't that a shame?
We've faded for so long

Given a life and no one knew
(Had not one thing to do with you)
Your will is frozen to the core
(You want it less but need it more)
Reach down and feel what you've become

You know your fight has just begun, it's just begun

They said
All we had we've wasted
Something like decay
You know it won't be long
Before we've spent all our lives complacent
Isn't that a shame?
We've faded for so long
So long

Fading like decay
Fading like decay
Fading like decay
Fading like decay

They said
All we had we've wasted
Something like decay
You know it won't be long
Before we've spent all our lives complacent
Isn't that a shame?
We've faded for so long
So long
