

The Last One of Us

Tremonti

Leave now while you still can
Down that last road
So the story goes
To where nobody's been

Devotion and the lost time
Been left here on the vine
And seasons fade so fast

Someday you'll find the truth, now don't you fear
I'm told it lies within

You're the last one of us
Don't have the answer
But I know where to find it
You're the reason to change
You're the reason I awaken
Each and every day
Each and every day

Unbroken but so unsure
Just maybe you've got nothing more
For what else could you write?

Too late to turn back now
This road ends a world away
Forever starts today

Today you'll find the truth, now don't you fear
I'm told we now begin

You're the last one of us
Don't have the answer
But I know where to find it
You're the reason to change
You're the reason I awaken
Each and every day
Each and every day

Let me hear you, teach me again
After all we've been through, see it to the end

You're the last one of us
Don't have the answer
But I know where to find it
You're the reason to change
You're the reason I awaken
Each and every day
