Sometimes I want to get out and feel the wind on my skin Turn the noise down. Fly over the weight of this dive and escape find my own ground Well I'm just going to drive don't know what I aim to find Keep me in your prayers and I'll keep you in my mind. Won't you sing me a mountain song sing it for the night so long Out across the hills forever more. Cuz' noone wants to live tied down take me where the lights come 'round Where I can live the life I was made for. Sometimes I want to rome far away from these walls, from familiar and help my spirit lift high above all this talk into the bright blue Well keep the fire lit and dream of open arms cuz' as for me I can't pretend that I don't hear the call Won't you sing me a mountain song sing it for the night so long Out across the hills forever more. Cuz' noone wants to live tied down take me where the lights come 'round Where I can live a life Where I can live a life I was made for. Where I can live a life Where I can live a life Where I can lay a life I was made for.
