

Toxxxic

Trevor Daniel

Baby last night, was the last time I gave you a pass, I... think it's time for me to go
Right you, but the wrong time, see the gas light on my heart and it's getting low
My friends told me that you were toxxxic, always a problem, always some gossip, and you've
Got me sick, got me nauseous, and you always got to run your mouth like a faucet
I don't know why I still put up with your nonsense, bitch I'm hot shit check the trending topics
I thought I found someone who understands my mind, til you start tearing me down, really
Getting out of line
Tried to lock me down for life, didn't commit a crime
I opened up my heart, I should've opened up my eyes
And if you think you're special I think you should stand in line, to see the asses on these other
Women that have caught my eye

I see the toxicity, of your energy, it don't interest me you're my enemy
I see the toxicity, of your energy, are you listening? You're my enemy

Just another heartbreak, just another test
It's always the same thing baby more or less
I just need some sleep, I just need to clear my head, I can see it in her eyes all she see is red
And if I wanna kick it with her imma need a sled, cause her heart's cold, ice age, imma end up
Dead
"I'm sick, I'm sick"
"Baby imma mess"
I'm too young to go out from the pressure of your stress

I see the toxicity, of your energy, it don't interest me you're my enemy
I see the toxicity, of your energy, are you listening? You're my enemy

I see the toxicity, of your energy, it don't interest me you're my enemy
I see the toxicity, of your energy, are you listening? You're my enemy
