

My eyes open  
Your words spoken  
Old ways broken  
Our love chosen  
Heartbeats growing  
Fragile moment  
Embrace challenge  
We'll find balance

Something that we talk about but don't show  
Something that we talk about but don't show  
Something that we talk about but don't show  
Something that we talk about

Holding steady  
Now we're ready  
In good timing  
Ourselves we're finding  
I see your nature  
You see my maker  
This is our story  
All of it's glory

Something that we talk about but don't show  
Something that we talk about but don't show  
Something that we talk about but don't show  
Something that we talk about but don't show  
Something that we talk about but don't show  
Something that we talk about but don't show  
Something that we talk about but don't show  
Something that we talk about

Something that we talk about but don't show  
Something that we talk about but don't show  
Something that we talk about but don't show  
Something that we talk about

Something that we talk about but don't show  
Something that we talk about but don't show  
Something that we talk about
