

Karma

Trevor Hall

Rain from the cloud flowing out my mouth
Rivers and streams made of all my doubts
Looking everywhere but the here and now
All these storms coming back around

Three in Fire
Five in Water
One like a son
One like a daughter

Gotta break that cycle break it strong
This been going on way too long
Being human so confusing
Some winning sometime losing

Karma
You got me thinking again
Of all this virtue and sin
That's going round and round and

Karma
Now as your cycle returns
Between the sky and the earth
It's nice to meet you again

Roaming through that scorpio
Stinging myself with everything I hold
Better know my stars to know my soul
This current's strong so I learn to row
I learn to row

Because nothing is as it may seem
Don't believe everything you think
When the mind is spinning
What to believe?
Root down strong like a banyan tree
I see this is the law of creation
My being is one constellation
All in all it's all divination
Elevating my meditation with
Karma

You got me thinking again
Of all this virtue and sin
That's going round and round and

Karma
Now as your cycle returns
Between the sky and the earth
It's nice to meet you again

Karma
You got me thinking again
Of all this virtue and sin
That's going round and round and

Karma

Now as your cycle returns
Between the sky and the earth
It's nice to meet you again

Karma
You got me thinking again
... round and round and

Karma
Now as your cycle returns
Between the sky and the earth
It's nice to meet you again
