

Moon / Sun

Trevor Hall

Here we go again, creation
Clap now for the jubilation
Look at all that light you making
Send it out no reservation
Like a river we let it flow
Still hot like a volcano
Mother Earth still got my soul
In the hot, in the cold, in the rain, in the snow
Hey lo! Wish on a butterfly wing
Take that crown, put it on that king
Sing like a child – no care for opinion
Real love across our dominion
Oh so bountiful!
Pull it back and let it go
Like ocean wave, we're powerful
Constellation, magical

So, this love still holds true
Now what you gonna do?
I won't give up on you
I won't give up on you
Between the moon and sun
This life is never done
I won't give up on you
I won't give up on you
I won't give up on you
Send up send up send up my love
I won't give up on you

I stand up, gotta put my hands up
Fruit down straw like Mauna Kea
In the ocean, holy motion
Ride that flow – I'll see you later
In the park of Shangri-la I see my ma
She's standing holy, all those colors filled with glory
Open up and hear this story:

Oh, this love still holds true
Now what you gonna do?
I won't give up on you
I won't give up on you
Between the moon and sun
This life is never done
I won't give up on you
I won't give up on you
This love still holds true
Now what you gonna do?
I won't give up on you
I won't give up on you
Between the moon and sun
This life is never done
I won't give up on you
I won't give up on you

I will follow you
I will follow you
I will follow, follow, follow you

I will follow you
I will follow you
I will follow, follow, follow you
I will follow you
I will follow you
I will follow, follow, follow you
I will follow you
I will follow you
I will follow, follow, follow you
I will follow you
I will follow you
I will follow, follow, follow you
I will follow you
I will follow you
I will follow, follow, follow you
I will follow you
I will follow you
I will follow, follow, follow you

I will follow you
