

# Wander

Trevor Hall

And so I wonder, wonder where my home is  
Where I come from, how the makers sowed it  
The constellations, how we all connected  
In the hall all rows intersected

True blue ocean, the meaning feels heavy  
But I let go, I let go, stay ready  
By the roots of my toes I am steady  
I don't take from the road I've got plenty

My home is where I wander  
My home is where I wander  
My home is where I wander  
My home is where I wander, body and soul  
My home is where I wander  
My home is where I wander  
My home is where I wander  
My home is where I wander, body and soul

Well the dreamer passed along a message  
It's been a long time friend since you've rested  
I got a map to all things that you're guessing  
Like the halo you're constantly testing

A deep breath is the medicine I needin'  
The elders asking me which wolf you feedin'  
They got me roaming through all the four seasons  
But their love is a love I believe in

My home is where I wander  
My home is where I wander  
My home is where I wander  
My home is where I wander, body and soul  
My home is where I wander  
My home is where I wander  
My home is where I wander  
My home is where I wander, body and soul

My home is where I wander  
My home is where I wander  
My home is where I wander  
My home is where I wander, body and soul  
My home is where I wander  
My home is where I wander  
My home is where I wander  
My home is where I wander, body and soul
