

# Rolling Stone

Trevor Jackson

She was from the country she want city love  
And the place that she was working didn't tip enough  
She's getting cold the fire place jus wasn't lit enough  
She really ready for mistakes jus want to live it up  
Roll it then the blunt is in rotation jus don't pass it by now  
Used to stand for something now she'd rather lie down  
Her soul has yet been tainted she sees no divide  
She ain't never ever felt when love and lust collide oh

She's a good girl she wanna go bad  
She been hurt a few times don't wanna go back  
Never had that special one she could confide in  
She just living loving life no fear of flying  
Oh baby was a rolling stone  
Playing many miles from home  
She got backup just in case you postpone  
She don't see the right from wrong  
Before the sun comes up she's getting gone

Ain't much time for her to see  
That it's special to be different  
Hopefully one day she'll see what that means  
She just wanna party all the time do the drugs  
She just wanna party all the time turn it up  
She so sick of starting she jus wanna finish up  
Ooh no matter what it costs

Mami was a rolling stone  
Way too many miles from home  
I know that sometimes you feel alone  
But you ain't gotta go out there you are never really on your own  
Ooh you ain't have to take the backseat no more  
One day you'll find a guy who will love you right I know
