Triathalon

Something got me feeling removed
Help me get myself in the groove
Thinking bout your body to sleep
Watch me when I walk in the room

Can we go back I need some simple things
Like riding my bike late at night
I'll tell you everything
I can get it in the morning morning (morning)
Watch the sun rise in the ocean
Yeah I don't want to think about [?] that always got me down
Everybody's something now
I'm just trying to break it down

This song don't mean shit my girl don't need that
All she wants is love and me to lean back
Chilling at the house no [?] just relax
Put my feet back and relax

Something got me feeling removed
Help me get myself in the groove
Thinking bout your body to sleep
Watch me when I walk in the room

Don't worry baby nobody gonna tell you where you wanna be
Don't worry baby nobody gonna follow you in front of me
Don't worry baby nobody gonna tell you where you wanna be
Don't worry baby nobody gonna follow you in front of me

This song don't mean shit my girl don't need that
All she wants is love and me to lean back
Chilling at the house no [?] just relax
Put my feet back and relax
