

Running

Triathalon

I know she running from you
I know she running from you
I know she running from you
I know she running
I know she running from you
I know she running from you
I know she running from you
I know she running

I hope it's nothing
It's always something
I'm always rushing
Gotta get my way home
Gotta do what I know
Gotta push myself on
Gotta know what I want
I know you're running

I know she running from you
I know she running from you
I know she running from you
I know she running

I hope it's nothing
It's always something
I'm always rushing
Gotta get my way home
Gotta do what I know
Gotta push myself on
Gotta know what I want
I know you're running

I know she running from you
I know she running from you
I know she running from you
I know she running
I know she running from you
I know she running from you
I know she running from you
I know she running
