

Leave The Lights

Tricky

Now I think it over
All day
Scream and shout I think the world is over
Today

Maybe see you in the future
Someday
My love it really suits you
That way

Left alone leave the lights
Left behind low supplies

I follow you nowhere
I follow you to nowhere
Where we go can't be late
Falling through make them wait

I can feel
You're too close
I beg and steal
Then I froze
I can feel
Locked in room
Take a pill
I can't move

I stand still
I stand up
Nothing's real
Looking up

Left alone leave the lights
Left behind low supplies

I follow you nowhere
I follow you to nowhere

Where we go can't be late
Falling through make them wait

Left alone leave the lights
Left behind low supplies

I follow you nowhere
I follow you to nowhere
