

# This Goodbye

**Trijntje Oosterhuis**

Where is your heart

Where is my life

Where did you lose

This moment in time

Chorus

I close my eyes and pretend you're still beside me

As if you never disappeared

How am I supposed to understand

You've gone and left me here

Verse

A million moments,

A million thoughts go through my mind

So many questions

Should I be angry, am I blind

I should be mad

But all I do is feel guilty instead

Where are you now

You run but you can't hide

Do you ever think about your life now that you're

lonely

And what you left behind

Chorus

You ran away and left me here with all your madness

You never even told me why

How am I supposed to understand this goodbye

Bridge

Does life treat you better

Now that you are free

Are you really happy

Happy without me

Chorus

You ran away and left me here with all your madness

You never even told me why

How am I supposed to understand this goodbye
