

Take It Slow

Trinidad Cardona

I told her little mama take a stroll
And I told her get that thing up out your nose
Then I sit and crash them Xanies in the zone
While she order a Perky on the phone

I told her little mama take a stroll
And I told her get that thing up out your nose
Then I sit and crash them Xanies in the zone
While she order a Perky on the phone

I like the way you are
You're tearing me apart
I'm hoping on a star
But I know it's getting dark
I like the way you are
You're tearing me apart
I'm hoping on a star
But I know it's getting dark

I told her not to go there
'Cause they're watching all your life
I never tried to shield you
'Cause I never thought you're mine
The Xanny taking over
'Cause you're falling left and right
You keep on talking bout it
Like you're asking for a prize

I'm really not much better
I'm a drinker on the flight
I drown myself in bottle
While they're falling from my eyes
I promise I can save you
But I promise not tonight
I promise I can save you
But I promise not tonight

I told her little mama take a stroll
And I told her get that thing up out your nose
Then I sit and crash them Xannys in the zone
While she order a Perky on the phone

I told her little mama take a stroll
And I told her get that thing up out your nose
Then I sit and crash them Xanies in the zone
While she order a Perky on the phone

I like the way you are
You're tearing me apart
I'm hoping on a star
But I know it's getting dark
I like the way you are
You're tearing me apart
I'm hoping on a star
But I know it's getting dark
