

Tell The Truth

Trinidad Cardona

All that late night talking girl don't say it was nothing
Every day is something else you say
It's not working
One day you love me then the next you leave me all alone
I just can't trust it anymore

You can keep the lie up if you want to
I'll be wrong I can try to play along
Just don't need me when you're gone
You do what you want
Just know the bed is made for two
There's no me if there's no you

I wish you tell the truth, to me, to me
I wish you tell the truth, to me, to me
I wish you tell the truth

Everyday it's on and off
Love to press my buttons
Am I right or are you wrong
Maybe we're just frontin

One day you love me the next you leave me all alone
I just can't trust it anymore

You can keep the lie up if you want to I'll be wrong
I can try to play along just don't need me when you're gone
You do what you want just know the bed is made for two
There's no me if there's no you

I wish you tell the truth, to me, to me
I wish you tell the truth, to me, to me
I wish you tell the truth

All that late night talking girl don't say it was nothing
Every day is something else you say
It's not working
One day you love me then the next you leave me all alone
I just can't trust it anymore

I wish you tell the truth, to me, to me
I wish you tell the truth, to me, to me
I wish you tell the truth
