

# Loverose

Triple One

I been up waiting for it all night long  
I seen it burning from the inside, oh  
And the melody sings, yeah the melody sings to me  
All the days in my bed, all the nights that I felt the breeze

For goodness sake girl you can take it all  
I seen you running from the outside, oh  
And the melody sings, yeah the melody sings to me

All the things that you said, all the things that you said to me  
Got a few friends, still lonely though  
People talk like the aliens, I'm well outside of my comfort zone  
If it all made sense, I walk you home  
Sit outside and smoke cigarettes, feel like I'm not, not alone  
But that's fucking useless, isolate while I paraglide  
Tying nooses around the rumours, isolation is do or die  
Do or die so I get it done, and I get it done like a cattle dog  
Scrapping like I'm tryna hold the facts, while they spreading shit like some  
alley cats  
Why you calling it easy, you don't know shit about it  
You don't know shit about nothing, you just some fuckin' actors  
And actors playing their part, but they don't write no chapters  
I write my shit from the heart and all we spit is acid

No I don't wanna leave, no I don't wanna know  
Melting in a moment melting in the snow  
Don't wanna parlay, don't wanna start  
No I don't wanna leave, no I don't wanna go, ayo

I been up waiting for it all night long  
I seen it burning from the inside, oh  
And the melody sings, yeah the melody sings to me  
All the days in my bed, all the nights that I felt the breeze

For goodness sake girl you can take it all  
I seen you running from the outside, oh  
And the melody sings, yeah the melody sings to me  
All the things that you said, all the things that you said to me

Got a spaceship, 2 wings  
6 jets, gold ring  
Blue girl, sweet dream  
Full cream, so mean  
And I, heart her  
And she, heart me  
And we glide round  
With that chrome dream  
See that's my type of lady  
But she can not save me  
Hit light speed, we switch dials  
This mission is futile  
Take all of my rocket, and hold on my pocket  
Baby spit it then hock it  
Sit on my booster, get neck like a rooster  
We never go too far  
Fight and then make up, fight and make love  
Fight and the fuck

Wasn't made for mass production, darlin' I'm all broken  
Who engineered the human is a sick and twisted one  
And the higher that we fly, the smaller we seem to some  
I'm on top right now but I might drop right now  
I'm on top right now I'll never drop right now

I been up waiting for it all night long  
I seen it burning from the inside, oh  
And the melody sings, yeah the melody sings to me  
All the days in my bed, all the nights that I felt the breeze

For goodness sake girl you can take it all  
I seen you running from the outside, oh  
And the melody sings, yeah the melody sings to me  
All the things that you said, all the things that you said to me
