Love Alone

Trisha Yearwood

It's been a long road, but we got here It wasn't easy, but it was true We found out through all the bad times It all comes down to me and you

We held the greatest expectations Only to find it was not to be All the dreams we left behind us Only serve to set us free

We don't need no bag of silver We don't need no fields of gold Don't it make you high Make you want to fly Knowing we can live on love alone?

We made our break straight out of high school You went your way and I went mine Everything that we went looking for Was here inside uss all the time

We don't need no bag of silver We don't need no fields of gold Don't it make you high Make you want to fly Knowing we can live on love alone?

We have shared every tear Through the years For all the laughter and the pain One thing remains

We don't need no bag of silver We don't need no fields of gold Don't it make you high Make you want to fly Knowing we can live on love alone?
