Blackout

Tritonal

Two hungry hearts, a city divided
Pulled in the dark, so strong it was violent

Yeah, it was you and me, you and me against the world
It was you and me, you and me against the world

Don't you worry, baby, there's a fire for us
No, we're not going down on a blackout
And if the storm's above me crumble into dust
No, we're not going down in a blackout

System's down, the system's down
But we made light in a blackout

Oh no, no, no, the waves on the wire
Streets growing cold, cold
But we burn, burn brighter

Cause it's like you and me, you and me against the world
It's like you and me, you and me against the world

Don't you worry, baby, there's a fire for us
No, we're not going down on a blackout
And if the stars above me crumble into dust
No, we're not going down in a blackout

We made light in a, in a...
Going down, going down in a blackout
In a, in a...

Don't you worry, baby, there's a fire for us
No, we're not going down on a blackout
And if the stars above me, they crumble into dust
No, we're not going down in a blackout
