

Escape

Tritonal

Oh, they're onto us
They know we wanna go
So let's prove them right
Take off and hit the road

When they open their mouth bullshit comes out
But I don't hear a thing
Oh it's all just a game they want us to play
But we don't aim to please

We can, we can escape this
We can run right through the chains, yeah
Right here, right now we're breaking
All the crazy rules that they're making
We can, we can escape this
We can run right through the chains, yeah
Right here, right now we're breaking
All the fucking rules that they're making

(Right through the chains, yeah)

Now we're all alone
Just us and flashing lights
Can you feel the rush all over us inside

When they open their mouth bullshit comes out
But I don't hear a thing
Oh it's all just a game they want us to play
But we don't aim to please

We can, we can escape this
We can run right through the chains, yeah
Right here, right now we're breaking
All the crazy rules that they're making
We can, we can escape this
We can run right through the chains, yeah
Right here, right now we're breaking
All the fucking rules that they're making

(Right through the chains, yeah)
