

From The Inside

Tritonal

You've been building
Your way to find happiness
But you can't walk down the road
Until you fix the cracks first

Ooh, and it feels like drowning

But give it time and
You'll find your way back up again

Don't leave, just breathe
You'll work it out from the inside
Break through, clear view
You'll find a place where you can hide
Just when you thought it was over
Further away but you're closer
Don't leave, just breathe
You'll work it out from the inside

It's so easy to [?]
But all that panning for gold
Isn't going to change your mind

Ooh, and it feels like drowning

But give it time and
You'll find your way back up again

Don't leave, just breathe
You'll work it out from the inside
Break through, clear view
You'll find a place where you can hide
Just when you thought it was over
Further away but you're closer
Don't leave, just breathe
You'll work it out from the inside

Don't leave, and just breathe
Don't leave, and just breathe
Don't leave, and just breathe
Don't leave, and just breathe
