

Lifted

Tritonal

You
You made my heart move
Don't ask me how it felt they won't believe me
But now
The shimmer's gone somehow
Luster fades and gives way to truth... la la la lifted
Love can't stay on a higher ground
The fall from grace may not make a sound
Just pull me close... never let me down
I want a love that's lifted
The truth is there in loss that have retraced
But I'm not scared to part ways anymore
What's the use?
Searching for love when you're afraid
Doing it all to make sure your heart stays...
Love can't stay on a higher ground
The fall from grace may not make a sound
Just pull me close... never let me down
I want a love that's lifted
