Running Into Me

Tritonal

Tonight, lights won't die
When I'm in your eyes
I wanna feel you close
Tonight, gonna make it right
These tears will dry
You're all I wanna know

Just like stars collide
I'm running into you
You're running into me
You're a force I can't deny
Let's lose ourselves in gravity

You can have all of me
So take me on tonight
And baby that's all I need
To make me come alive

Your love, your love
Is my energy, my energy
Your love, your love
Is my energy, my energy

Right now, we're bringing down
The speed of sound
Losing all control
Right here, the sound's so clean
I could disappear
Free fall into your soul

Just like stars collide
I'm running into you
You're running into me
You're a force I can't deny
Let's lose ourselves in gravity

You can have all of me
So take me on tonight
And baby that's all I need
To make me come alive

Your love, your love
Is my energy, my energy
Your love, your love
Is my energy, my energy

Your love, your love
Is my energy, my energy
Your love, your love
Is my energy, my energy

Just like stars collide
I'm running into you
You're running into me
