

Safe & Sound

Tritonal

Safe and sound
Alive under stars
Breathing out

Close your eyes
Begin to let go
Here right now

When we're halfway in
It gets hard to find the way
And we lose ourselves, get stuck in the yesterday
All the indecision clouds our destiny
We're here right now
We're safe and sound

So hold tight
Don't run away from love and hold tight
Don't ever let it go
Hold tight
We only got this moment
Hold tight

Feel the sky
An ocean above
Endless light

Trust the fall
The echo inside
We can fly

When we're halfway in
It gets hard to find the way
And we lose ourselves, get stuck in the yesterday
All the indecision clouds our destiny
We're here right now
We're safe and sound

So hold tight
Don't run away from love and hold tight
Don't ever let it go
Hold tight
We only got this moment
Hold tight
We'll never be this young

When we're halfway in
It gets hard to find the way
And we lose ourselves, get stuck in the yesterday
All the indecision clouds our destiny
We're here right now
We're safe and sound
So hold tight
