

# Signals

Tritonal

If you were my true love  
The universe would show me where you are  
And if I am, who you think of  
Then you can feel me wish upon a star

Your voice, hear it inside me  
Cut through noise, feel how it guides me  
My choice, my destiny, my truth

Like signals in the sky  
So high  
Our frequencies align  
Tonight

If you were my answer  
To the only question I have left  
Is there happy, ever after  
Will I say your name until my final breath?

My voice, hear it inside you  
Cut through noise, feel how it guides you  
Our choice, our destiny, our truth

Like signals in the sky  
So high  
Our frequencies align  
Tonight

Like signals in the sky
