

Girl Next Door

Trixie Mattel

The sun, it goes down like anything
Hard to believe I used to see the silver lining
The tide it rolled in, it's getting low
You got me wondering your number in the undertone

Before you go
I really want you to know

If you're ever feeling bored
I just moved in, I'm the girl next door
I'd like to have you on my hardwood floor
You can call me up, with love, the girl next door

You've got your blue suit, you've got your ring
You've got the way of thinking you know everything and
You run a tight ship up to the shore
You left me going now I'm going overboard

Before you go
I really want you to know

If you're ever feeling bored
I just moved in, I'm the girl next door
I'd like to have you on my hardwood floor
You can call me up, with love, the girl next door

So pick up the phone
I wanna know that you're home
And let me know
'Cause you know that I'll be waiting alone
You do or you don't here we go

If you're ever feeling bored
I just moved in, I'm the girl next door
I'd like to have you on my hardwood floor
You can call me up, with love
You can call me up, with love
You can call me up, with love, the girl next door
