

BHD Commercial

Troy Ave

There's an epidemic running rampant called BHD

Pause

BHD, which stands for Broke Hater disease, is contagious, and appears in weak minded, and jealous people, usually when they're around people of success

Outbreaks may occur, when one hater is standing next to another

It can be geneticly passed from generation to generation

So, if you're DAD or MOM has BHD, more than likeley, YOU will too

Side effects include: change in behavior, hostility, depression and malicious thoughts

If you have BHD, stay away from nice neighbourhoods, the clubs, resorts, professional games and more importantly, the internet

If you're experienceing any of these side effects, you can do two things

Contact your doctor, or get yourself some fucking money

Don't let BHD control you, control BHD
